

ATOMIC 22 RCR-22

FM-RDS (RBDS) / AM / Aux-in Tuning Clock Radio with Radio Controlled Clock

The Atomic 22 Clock Radio is an atomic clock radio you can set once and it will remember your preferences. It connects to the atomic DCF signal to set the most accurate time available. Once the clock is set you can program the dual alarms to wake to your favorite AM or FM station. Take advantage of the Humane Waking System that begins with a low volume beep and gradually increases in intensity to gently wake you. There is also a handy sleep timer that allows you to fall asleep listening to your favorite radio station from 15 minutes up to 2 hours.

With the AM/FM digital tuning you can receive your favorite radio stations and store them in the 14 Presets (7FM, 7AM). With the double digital clock display with adjustable backlight, you can clearly see the time and all other information. The DCF controlled clock automatically sets the time exactly right, even after a power fail. With the 2 alarm timer and the HWS (Humane Wake System) buzzer and radio you will wake up as comfortable as possible. The aux-input can be used to listen to external devices such as mp3 players or smartphones.
